Across the Lake States, New England and the southeast US

- Average size of hardwood logs is declining
- Average quality of hardwood logs is declining
- Regulatory agencies are limiting and restricting access into environmentally sensitive areas
- Demand for crane mats and laminated wood mats has increased over the past 15 years
- The available hardwood log resource is well suited to the production of crane mats and laminated mats
- Areas of use for wood mats:
 1. Electric transmission lines
 2. Oil and gas pipelines
 3. Drill sites
 4. Bridges
 5. Wind Power
 6. Marine operations

Electric Transmission Lines

Oil & Gas Pipelines

Drill Sites

Bridges
